Profile Summary

Computer Science Engineering graduate with hands-on experience in Android App Development using Kotlin, XML, Firebase Authentication, and Firebase Firestore. Experienced in developing responsive mobile user interfaces, authentication features, real-time database integration, and application functionality. Seeking an entry-level Android Developer or Mobile Application Developer role.

Education

Bachelor of Engineering in Computer Science *2024 – 2026*
RTE Society's Rural Engineering College, Hulkoti
CGPA: 8.34/10

Diploma in Computer Science *2020 – 2023*
K.L.E's Smt C.I. Munavalli Polytechnic, Hubli
CGPA: 8.56/10

Technical Skills

- **Programming Languages:** Kotlin, Java, Python, JavaScript, SQL, HTML, CSS
- **Android Development:** Android Studio, Kotlin, XML, Android SDK, Activities, Fragments, RecyclerView, Responsive UI Design
- **Backend & APIs:** RESTful APIs, JSON, Python (Flask), Firebase
- **Database:** Firebase Firestore, MySQL, MongoDB, SQL
- **Authentication & Services:** Firebase Authentication, Real-Time Data Management, Notifications
- **Tools:** Android Studio, Git, GitHub, VS Code, Eclipse, Postman
- **Development Concepts:** OOP, DSA, MVC Architecture, CRUD Operations, Database Management, Authentication & Authorization, Git Version Control

Projects

NIMMA-GURU – Community Mentorship Android Application *03/26 – 05/26*
Kotlin, XML, Firebase Authentication, Firebase Firestore
- Developed an Android community mentorship application with mentor profiles, search, filtering, scheduling, notifications, and appreciation features.
- Integrated Firebase Authentication and Firestore for secure user authentication and real-time data management.
- Designed responsive mobile interfaces with Kannada and English language support for improved accessibility.

Palm Vein Payment System *09/25 – 12/25*
Python, Flask, Machine Learning, MySQL
- Developed a biometric payment system using palm vein recognition and machine learning for secure user authentication.
- Implemented backend APIs and database integration to support authentication and payment transaction workflows.

FoodFinder – Restaurant Discovery and Booking Website *07/25 – 09/25*
HTML, CSS, JavaScript, Bootstrap, JSP, Servlets, MySQL
- Built a responsive restaurant discovery and booking application with restaurant listings, menus, cart, checkout, and booking workflows.
- Implemented authentication, CRUD operations, backend processing, and MySQL database integration.

Antivirus Application *03/23 – 06/23*
Python, JSON, Multithreading, Multiprocessing
- Built a Python-based antivirus application using hashing algorithms and virus signatures for malware detection.
- Implemented multithreading and multiprocessing to improve scanning performance and used JSON for application data management.

Internships

Android App Development using GenAI Intern *02/26 – 05/26*

MindMatrix LMS

- Worked on Android application development using Kotlin, XML, Firebase Authentication, and Firebase Firestore.
- Developed responsive mobile user interfaces and implemented real-time database integration for application features.
- Utilized Generative AI tools to accelerate application development, debugging, and feature implementation.

Cyber Security Intern *02/23 – 06/23*

Athreya Technologies

- Developed responsive web applications using HTML, CSS, JavaScript, Python, and Flask.
- Worked on backend functionality, database integration, and secure authentication systems for web applications.
- Performed vulnerability scanning, penetration testing, and security analysis to identify potential security issues.

Certifications

- Java Software Developer – Infosys
- Internship in Cyber Security – Spidervella
- Machine Learning – Simplilearn
- Data Visualization – IBM
- JavaScript, HTML, CSS, MongoDB, Python Bootcamp – LetsUpgrade

Languages

- English
- Hindi
- Kannada
